

PROFESSIONAL SUMMARY

Curious and growth-oriented Full-Stack Software Developer with commercial freelancing experience engineering responsive applications and marketplaces. Strong grasp of computer science fundamentals, including Object-Oriented Programming (OOP) and relational database design. Adept at translating user requirements into clean, scalable code utilizing AI-assisted development tools (Cursor, Claude) as a workflow multiplier. Eager to bring strong backend logic and a global-first mindset to a high-scale, product-driven engineering team.

Technical Skills

- *Core Fundamentals: Object-Oriented Programming (OOP), MVC Architecture, Data Structures, RESTful APIs*
- *Languages & Frameworks: JavaScript, PHP (Laravel Ecosystem), HTML5, CSS3, Vue.js, Statamic CMS*
- *Databases & Tools: MySQL (Relational), Git Version Control, CI/CD, Ploi.io, Linux Server Setup, TailwindCSS*
- *AI & Productivity: Gemini, ChatGPT, OpenAI API, GitHub Issues, Agile Team Collaboration*

Freelance Software Developer | 01/2023 – Present

Ninetyseven Accounting (Corporate Financial Platform) | Feb 2026

- *Built and launched a complete corporate web platform utilizing a customized WordPress engine.*
- *Structured web layouts mapped directly to UK financial regulations and client compliance briefs.*
- *Handled the complete end-to-end production pipeline including custom domain and DNS zone management.*
- *Formatted structural internal links to effectively capture localized commercial search traffic.*

TapChat (Live Squarespace Website) | Jan 2025

- *Transformed user design briefs and wireframes into a fully functional, live digital product platform.*
- *Designed and engineered the custom UI/UX using platform native tools alongside custom CSS styling.*
- *Delivered highly responsive cross-device layouts ensuring swift performance from desktop to mobile viewports.*
- *Applied user-first design methodologies to establish clean site architecture, strong branding, and usability.*

La Alexia Atelier (Beauty Salon Application) | Nov 2024

- *Developed a full-stack Laravel application featuring custom routing, controllers, and structured Blade templates.*
- *Secured user inputs by implementing robust server-side form request validation rules.*
- *Elevated Google Lighthouse SEO performance from 70 to 95 using semantic HTML and optimized metadata.*
- *Achieved a 40% reduction in page load times by implementing lazy loading and optimizing MySQL database queries.*
- *Deployed infrastructure via Git and Ploi.io, managing SSL installation and DNS zones via Fasthosts.*

P4Events (Event Management Platform) | May 2023

- *Collaborated in a 3-developer team to modernize a legacy platform utilizing Laravel, Vue.js, and Statamic CMS.*
- *Refactored technical debt in heritage PHP codebases and streamlined database schemas to enhance site scaling.*
- *Configured continuous integration workflows to guarantee deployment transitions with zero platform downtime.*

Associate Web Engineer (Training Contract) | OpenClassrooms | May 2021 – Oct 2022

- *Built full-stack applications, e-commerce platforms, and API architectures using Node.js, Express, and PostgreSQL/MongoDB.*
 - *Engineered mobile-first front-end interfaces with smooth custom animations using Vue.js, JavaScript, and SASS.*
 - *Audited and refactored applications to meet strict OWASP security standards and WCAG web accessibility mandates.*
 - *Implemented on-page SEO best practices and designed customized agile learning workflows for ongoing technical growth.*
-

EMPLOYMENT HISTORY

Manufacturing Technician | Hitachi Rail, Newton Aycliffe | 01/2023 – Present

- *Executed precision tasks from complex technical schematics to guarantee error-free manufacturing outputs.*
- *Audited production lines through strict quality assurance protocols to maintain regulatory compliance.*
- *Instructor | Amazon, Darlington | 01/2020 – 01/2023*
- *Mentored and onboarded over 200 personnel, accelerating operational readiness and team performance metrics.*
- *Transformed intricate technical floor guidelines into accessible instruction formats for cross-department staff.*

TECHNICAL PROJECTS

- *ToDoList CRUD Application | [Project Link](#)*
- *Built an independent CRUD system using Laravel architecture, RESTful routing, and automated MySQL migrations.*
- *Implemented multi-layered form verification routines combining JavaScript and server-side validation rules.*

EDUCATION & QUALIFICATIONS

EQF Level 5 Diploma in Computer Software Engineering | OpenClassrooms | Graduated Nov 2022

NVQ 3 in Computer Hardware Technology | Pitman Training Group | Achieved Mar 2023 (Grade: 90%)

- *Core Focus: Networking, Device Hardware, Virtualization, Mobile Architecture, and Cloud Computing.*
 - *Functional Skills Level 2 – English | Achieved (Perfect 35/35 reading score)*
 - *Functional Skills Level 1 – Mathematics | Achieved (Score: 52/56)*
 - *Functional Skills Level 2 – Mathematics | In Progress*
-
